EDUCATION

IIT KHARAGPUR

Jul 2018 - Apr 2023

- Bachelor of Technology (B.Tech) | Aerospace Engineering & Engineering Entrepreneurship
- Computer Science Coursework:** Algorithms, Programming and Data Structures, Big Data Analytics

EXPERIENCE

FULL STACK DEVELOPER

Sept 2024 - Present

Dhan AI

Hyderabad, Telangana

- Architected an AI-powered telecom troubleshooting platform in **JavaScript** that multi-source diagnostics (network device, and customer activity) into a single decision workflow, reduce debug effort by **18 hours/week**
- Optimized real-time socket processing by implementing **multi-layer handler resolution** (user config, cache fallback, default fallback), improving dashboard **load responsiveness by up to 3x**
- Drove latency reduction initiatives in socket workflows by parallelizing independent query execution, cutting key **notification metric response time by ~40-50%**
- Designed resilient socket execution flows with per-metric error isolation and graceful fallbacks, eliminating cascade failures and significantly improving production reliability during partial downstream outages
- Built a comprehensive GraphQL API layer with TypeORM and PostGraphile supporting multi-datasource queries (**Trino, Pinot, PostgreSQL, MongoDB, MSSQL**) enabling clients to unify data across disparate systems.
- Delivered backend quality at scale with strict **TypeScript** practices, modular service/handler architecture, and comprehensive **Jest-based unit/e2e** test coverage, enabling safer releases across **DEV/STG/PROD** pipelines

SUMMER INTERN | SOFTWARE DEVELOPER

April 2022 - May 2022

eMagDevices, Ltd.

Hyderabad, Telangana

- Developed a Python-based optimization leveraging **OOP principles, Scipy(SLSQP), and Tkinter** for design
- Reduced manual engineering effort by **~99%** through **algorithmic design optimization, parametrized modeling**
- Collaborated with domain experts to **validate software outputs** against real-world engineering benchmarks, strengthening production readiness.
- Owned features end-to-end from algorithm implementations to **UI development and testing**

PROJECTS

WeHireIt

[Github](#)

- Built and deployed a full-stack job hiring platform with a decoupled **React 18** frontend and **Express REST API**
- Implemented comprehensive features including **user authentication, search functionality, and pagination**
- Rapidly delivered a fully containerized (**Docker**) full stack web application within an aggressive **2 day** timeline
- Secured API routes using **JWT authentication** and **Bcrypt password hashing** via custom Express middleware

SKILLS

Frameworks: React, jQuery, Bootstrap, Flask, Express.js, Postgraphile, TypeORM

Tools & Technologies: SQL, PostgreSQL, Node.js, MongoDB, Git, Figma, Postman, Elasticsearch, Redis, Kafka, Kibana

Cloud Services: AWS S3 (Storage), Docker, Kubernetes, Kibana, Pinot

Programming Languages & Concepts: C++, C, Python, JavaScript, Typescript, HTML5, CSS3, OOP, System Design

ACCOMPLISHMENTS

- Achieved **95.75** percentile in **JEE Advanced 2018** and **99** percentile in **JEE MAINS 2018**
- Secured **1776th** rank in Andhra Pradesh **EAMCET** and **1553st** rank in Telangana **EAMCET**
- Solved **500+** Data Structures and Algorithms problems across InterviewBit, LeetCode and GeeksforGeeks

CERTIFICATIONS

- Docker and Kubernetes, The Complete Guide, Udemy:** Learned all about containerization
- Web Development Bootcamp, Udemy:** Learned complete software development life cycle using React and Node
